EDUCATION

Christopher Newport University **Newport News, VA**
Bachelor of Science in Data Analytics and Finance *Expected Aug. 2027*
- Relevant Coursework: Data Analytics, Statistical Analysis, Financial Modeling, Database Management

PROJECTS

S&P 500 Risk & Return Dashboard | SQL, Tableau, SQLite, R **2026**
- Analyzed 10 years of S&P 500 prices for 500+ stocks, using SQL window functions in SQLite and R to calculate returns, volatility, and Sharpe ratios; built an interactive Tableau dashboard
- Found Information Technology led risk-adjusted returns (median Sharpe 0.64) while Consumer Staples (0.33) lagged
- Showed higher risk did not guarantee higher reward: Energy had the highest volatility (~40%) but a below-average Sharpe (0.37)

Electronics Sales Dashboard | Tableau **2026**
- Analyzed nearly 49,000 electronics sales transactions (~$43.6M) across 8 categories and built 5 Tableau visualizations
- Found the U.S. drove 53% of sales (UK 13%, Canada 8%); in-person made up about 69% of sales vs 31% online
- Identified strong seasonality, with sales peaking every December and dropping sharply each April

Customer Churn Analysis | R, Statistical Modeling **2026**
- Analyzed 7,000 telecom customers (26.7% churn rate) across 11 features; found month-to-month contracts churned at 42.9% versus 2.9% for two-year contracts, and first-year customers at 47.6%
- Built an R decision tree (79.5% validation accuracy) flagging month-to-month, fiber optic, new customers as top churn risk
- Recommended annual-contract discounts, new-customer priority support, and incentives to move off electronic check (45.4% churn)

Nationals Player Stats Analysis | Excel, Microsoft Access **2025**
- Analyzed 2019 stats for 50 Nationals players using Excel and a relational Access database with queries and forms
- Found Juan Soto and Anthony Rendon tied for the team lead with 34 HR, Rendon led in RBI (126) and batting average (.319), and Max Scherzer had the lowest ERA among starters (2.93)

EXPERIENCE

Trump National Golf Club **Sterling, VA**
Golf Operations *May 2025 – Aug. 2025*
- Owned daily tracking and reporting of cart and range equipment usage so assets stayed available for members and guests
- Took responsibility for member and guest golf bag records, keeping them accurate for easy retrieval and fast service
- Monitored range equipment and supply inventory and flagged shortages to management before they affected operations

DoorDash **Newport News, VA**
Delivery Driver *May 2022 – Present*
- Took full responsibility for every delivery, planning routes in real time to cut travel time and keep top on-time ratings
- Handled multiple orders at once, deciding priorities to keep every order accurate and on time
- Held myself accountable for customer satisfaction, maintaining a high rating through time management and order accuracy

Ashby Ponds Senior Living Community **Ashburn, VA**
Server / Food Runner *May 2022 – Feb. 2023*
- Tracked inventory across several supply categories and restocked ahead of shortages
- Took ownership of service issues, logging and resolving them in real time to keep resident dining experiences positive

CERTIFICATIONS & TRAINING

AI Concepts for Developers and Technology Professionals (Microsoft Learn) **Oct. 2026**
- Completed 7-module path; key insight: RAG cuts wrong AI answers by pulling from current company data

Introduction to Cloud Infrastructure: Describe Cloud Concepts (Microsoft Learn) **Oct. 2026**
- Completed 3-module path; key insight: cloud shifts IT costs from upfront CapEx to pay-as-you-go OpEx

AI Capabilities and Limitations (Anthropic) **Oct. 2026**
- Completed course; key insight: LLMs can state wrong answers confidently, so outputs need source checks

AI Fluency: Framework and Foundations (Anthropic) **Oct. 2026**
- Completed course; key insight: the 4D framework (Delegation, Description, Discernment, Diligence) drives effective AI use

Claude 101 (Anthropic) **Oct. 2026**
- Completed course; key insight: context, examples, and a clear goal make prompts far more reliable

TECHNICAL SKILLS

Languages & Tools: SQL, Tableau, Power BI, Microsoft Access, SQLite, R
Analytics: Statistical Analysis, Financial Analysis, Data Visualization, Dashboard Development, Predictive Modeling
Software: Microsoft Excel, Google Sheets, Microsoft Office 365, GitHub
Soft Skills: Communication, Problem Solving, Time Management, Customer Service, Inventory Management

ACTIVITIES & INTERESTS

Food for Neighbors – Food Pickup Organizer | Multi-Sport Athlete (Baseball, Basketball, Golf) | DECA | Sports Analysis Club
